

Getting Parents Involved

Getting Parents Involved, Costech Technologies is a firm believer in the partnership of teacher and parents educating the teens on traffic safety. We will in the very near future establish avenues for the parents to get all the information they need to complete the Graduated Licensing process. Stay tuned for the announcement.

Course Studies

Through our easy-to-use online system tools, students will enjoy the convenience of having their driver education textbook and other learning materials available at their "fingertips".

To help your students understand the material they are learning, you can set a proficiency level requirement. This will provide your teachers with a method of evaluating their students course progress, problem areas and comprehension abilities.

- ***Online Course Textbook***

The course textbook has been written to maximize the effectiveness of course content, allowing all students to benefit through standardized directives.

- ***Quizzes / Tests / Final Exams***

Auto correcting, instant results.

Randomization and question replacement helps to challenge what a student has retained from the course information by eliminating the chance of cheating by copying previous test responses.

Online in the Classroom

It is proven that computer-assisted teaching has been one of the most useful tools for teachers to date. It provides students with the 3 modalities of learning (kinesthetic, visual, and audio). This combination presenting course materials ultimately renders every teacher more effective.

Monitoring, Recording and Reporting

Monitoring, record keeping and reporting systems will provide you and your staff with the feedback and analysis that is critical to performing their jobs. It will provide detailed information about what a student has achieved, his/her performance and grades.

System Administrative tools provide for both the monitoring of a student's classroom and behind the wheel scheduling, progress and recordkeeping.

Review the back of this brochure for a list of the administrative and system tools available.

Customization and Development Services

We recognize that no two school systems will operate their Driver Education programs the same. That is why Costech's Online Driver Education System, is fully customizable. This means the program will not only reflect your unique identity and policies, but will meet all state compliance issues needed for your students driver education programs.

We can also align our online textbook to your course curriculum. Further, we will be happy to add any new topic to your course, to help ensure you provide your students will the best learning opportunity online education can provide.

Technology-based delivery of quality Driver Education Curriculums

Driving Safety is Everyone's Responsibility

Costech Technologies Inc., has been offering Driver Education Courses that pass stringent state and national guidelines for over 15 years. With great pride we would like to offer you the opportunity to be a part of this experience and join our team of educators in keeping our teens safe!

Online System Components

Teacher (Classroom)

Administrative

Student

Designed for everyone, its simple-to-use interface allows students to concentrate on learning the course materials.

Student tools provide effortless movement among the different options they will use during their driver education course.

- Tools**
- Record viewing
 - Internal communication between student and teacher.
 - Online textbook
 - Online practice quizzes
(reminder links to return textbook on wrong answers)
 - Online test, and final exam.
(auto-corrected for instance results)

For the first time every aspect of a student's progress is available at your fingertips. The tools provided:

- Internal communication between teacher and student
- Textbook (pages read and time spent on each page)
- Practice quizzes attempted.
(review of questions and student responses)
- Assign tests and final exam.
- Complete Student records review and much more.

Teacher (BTW)

When students have completed and passed the classroom portion of their driver education program, their records are tagged and ready to be assigned for btw lessons.

An administrator can now assign any students who have passed their classroom studies to a btw teacher for their in-car lessons.

The teacher can then post their in-car lesson schedule for all of their assigned student

Every aspect of the system is available. Tools will provide administrators with a complete overview of their county's driver education program.

Report functions include:

- Full System Summary Reporting
- Course Summary Reporting
- Location Summary Reporting
- Personnel Summary Reporting
- Classroom Teacher Reports and Activities
- BTW Teacher Reports and Activities
- BTW lesson assigning and record keeping.
- BTW Accident Reporting
 - Creation of Accident Reports
 - Viewing Accident Reports
 - Accident Report Analysis System

These are just a few of the utilities that are now available. For a complete system information please use the contact information or speak with a Costech Representative.

WE WILL BE HAPPY TO ASSIST YOU.
